Student Chapter's Presentation at 2011 Rising Construction Manager Conference available [here](#).

The Master of Science in Construction Management (MSCM) program at Texas A&M University is an advanced course of study. This leading program offers a curriculum that emphasizes the construction process, addressing topics in cost control, financial management, construction quality, project administration, project control for complex commercial or industrial construction projects, business management, contracts and law.

Individuals who complete the MSCM degree are prepared for leadership careers in the management of commercial, industrial, institutional, civil and military construction in the roles of contractor, developer, subcontractor, owner's representative or consultant.

## **University of Texas-Austin**

Civil, Architectural, and Environmental Engineering  
1 University Station, C1700, ECJ 4.200  
Austin, TX 78712

Student Chapter President: Fernando Mondragon  
Email: [mondragon@utexas.edu](mailto:mondragon@utexas.edu)

The Student Chapter of CMAA at the University of Texas at Austin (UT) was founded in 2011 as a student-run campus organization. It is housed under the Department of Civil, Architectural, and Environmental Engineering, with student members from both Civil and Architectural Engineering, as well as graduate students in the Construction Engineering and Project Management program. The undergraduate student population is exposed to the construction realm through technical electives offered in this program. According to multiple rankings, the Civil Engineering program for both undergraduates and graduates are among the top in the nation.

Planned CMAA events for the school year include multiple speaker series by industry professionals, site visits throughout the Austin area, an end of the semester BBQ, and other exciting activities to be announced. Through these events, the Chapter hopes to provide students with a more in-depth knowledge of the Construction Management profession, to connect students with members of the construction industry, and to help students understand the challenges and opportunities that Construction Managers face. Students involved in the Chapter work closely with the CMAA South Central Texas Chapter to help with these objectives.

**University of Texas-San Antonio**

Construction Science & Management

501 W. Cesar E. Chavez Boulevard

San Antonio, TX 78207
